DEPARTMENT OF THE NAVY
OFFICE OF THE UNDER SECRETARY
1000 NAVY PENTAGON
WASHINGTON DC 20350-1000

April 29, 1999

The Honorable Albert Gore, Jr.
President of the Senate
Washington, DC 20510

Dear Mr. President:

The purpose of this letter is to notify you of our decision to study certain functions performed by military and civilian personnel in the Department of the Navy for possible performance by private contractors.

As the Department seeks ways to improve efficiency and effectiveness, reduce the overall cost of operations and improve business processes, we are fully exploring opportunities for competition initiatives. In accordance with sub-paragraph (b) (1) of section 2461, Title 10 United States Code, the Secretary of Defense is to notify Congress of any decision to study commercial or industrial type functions performed by 50 or more civilian employees for possible outsourcing and to provide an estimate of the costs and length of each study. To provide you with a more comprehensive overview of our most recent competition initiatives, we are enclosing a list detailing functions both above and below 10 USC 2461's reporting threshold. These initiatives to study the performance of the commercial or industrial type functions by persons who are not civilian employees of the Department of Defense are not the result of constraints or limitations in terms of man years, end strengths, full-time equivalent positions or maximum number of employees. Please note that to ensure we obtain economies of scale, most of the smaller numbers of functions will be consolidated into larger regional or base-wide cost comparisons.

Where required, studies will be performed under the procedures set forth in Office of Management and Budget (OMB) Circular A-76. The military billets listed in the enclosure have been identified for substitution by civilian workers. The A-76 studies in each case will determine whether the function will be contracted out or performed by civilian employees of the Department of the Navy. The Department's estimated cost to study each full-time equivalent position is $2,000, and the estimated study time for single function studies is 12-18 months and 24-36 months for multifunction studies.

Conversion to commercial contracts will occur only if the cost comparison process reveals that contracting is the most cost effective method of performing the function. We will notify you by separate correspondence if the competition results in a decision to convert to contract performance.

A similar letter has been sent to the Speaker of the House of Representatives. As always, if I can be of further assistance, please let me know.

Sincerely,

Jerry MacArthur Hultin

Enclosure:
1. Competitive Sourcing Announcement
